

ALGORITHMIC SYNTHETIC
INDEX TRADING SOFTWARE

USER MANUAL

Requirements

The deriv trading account must be used EXCLUSIVELY with our Xeeru software as it may affect the proper functioning of our software. Please do not execute manual trading or other forms of trading.

Operative systems

Windows 8, 8.1, 10 of 64 bits

Connection

Stable internet connection

Recommended

Use VPS (Virtual Private Server)

Initial Setup

Initial setup

Initial setup of your deriv account

1. Login to your **deriv** account

Welcome!

Log in to continue.

Email is required.

[Forgot password?](#)

Log in

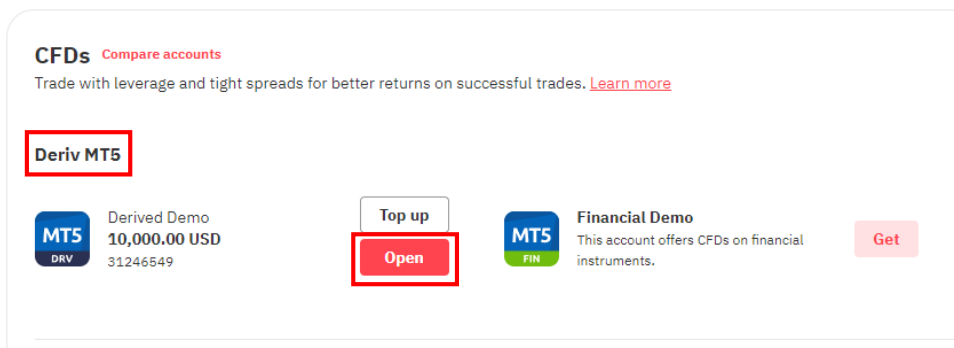

Initial setup

Initial setup of your deriv account

2. At the top left, click on Trader's Hub

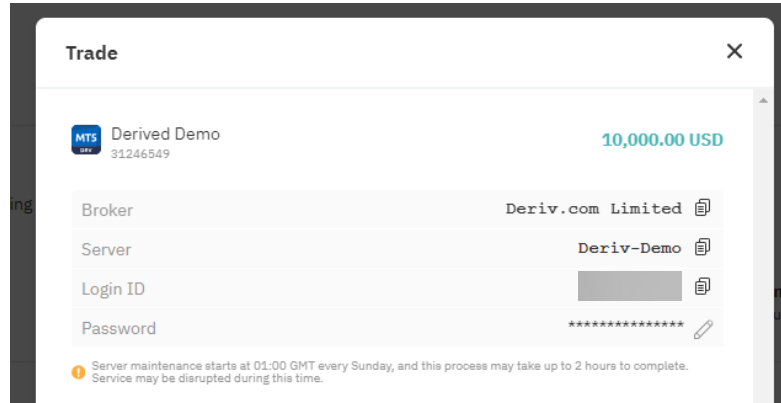

3. In the Deriv MT5 section, click on Open

Initial setup

Initial setup of your deriv account

4. Set up the password for your trading account. Please note all the information displayed in the image below as you will need it later.

5. Download MetaTrader 5 for Windows and install it on your computer.

	MetaTrader 5 web	Open
	MetaTrader 5 Windows app	Download
	MetaTrader 5 MacOS app	Download
	MetaTrader 5 Linux app	Learn more

Initial setup

Initial setup of your deriv account

6. After installation, access MetaTrader 5 with your Deriv credentials, enable algorithmic trading, type 'crash 300 index' in the green plus, and select it. Finally, choose M1.

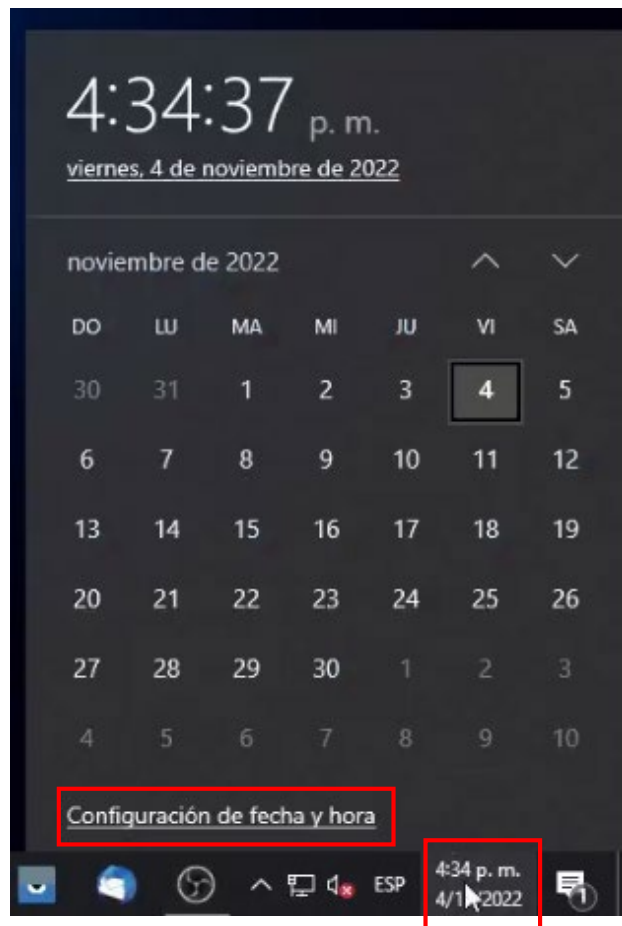

Setting Up

Setting up

IMPORTANT

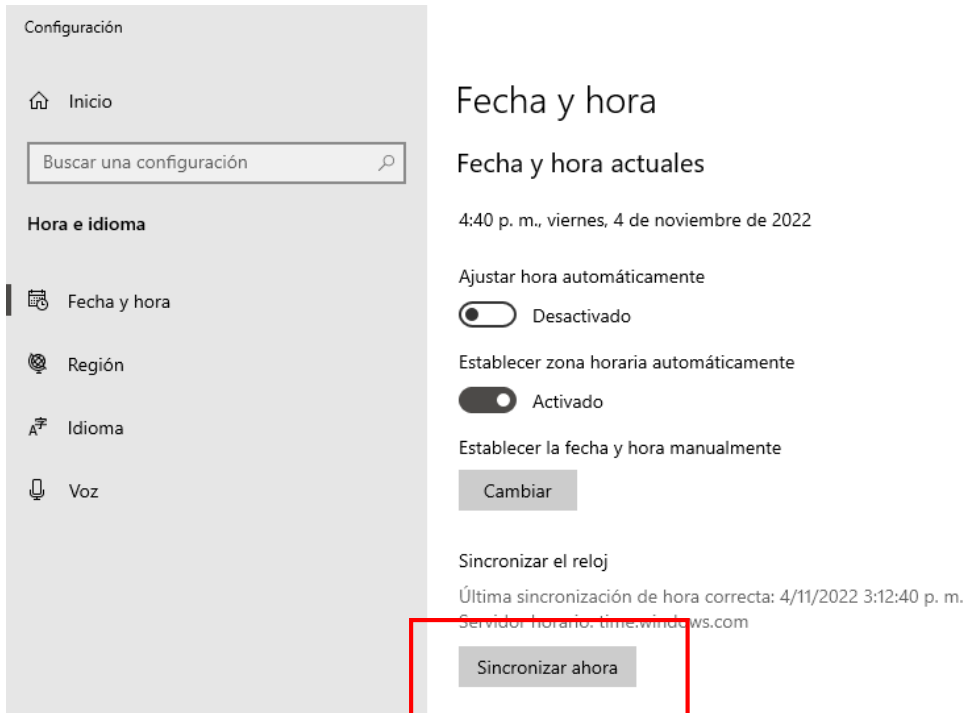

Ensure that the time and date on your operating system are synced correctly.

To synchronize them, click on the bottom right of your screen and then click on “Date and time settings”

Setting up

Click on “Sync Now”

Setting up

1. Once the payment has been made and confirmed, 24 hours later, please login with your username and password, established by you at the time of purchase

SUBSCRIBERS AREA

[Status of my SUBSCRIPTIONS](#)

I am subscribed to XEERU CRYPTO BOT (Available maximum 24 hours after making the payment):

[Access Now.](#)

Setting up

In this area, you will find the User manual, software installer, and **two single-user licenses**, each consisting of **10 alphanumeric characters** (one for a demo account and another for a real account on Deriv).

[Download User Manual](#)

[Download Installer](#)

Single-User License (Available maximum 24 hours after making the payment):

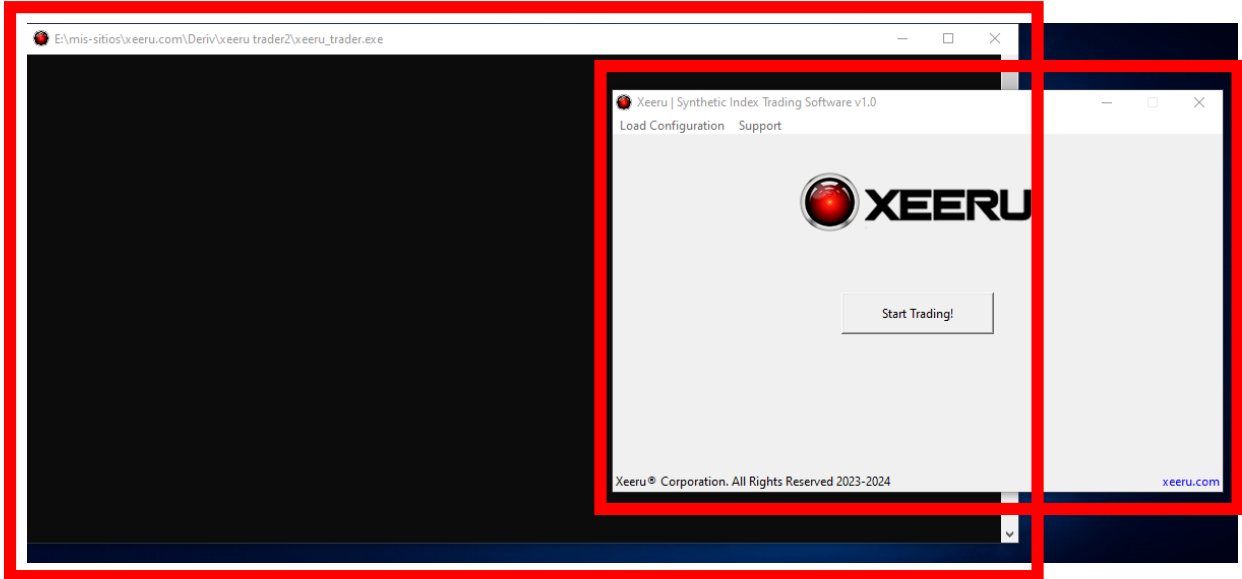

3. Download and install Xeeru Software

xeeru_trader.exe

Setting up

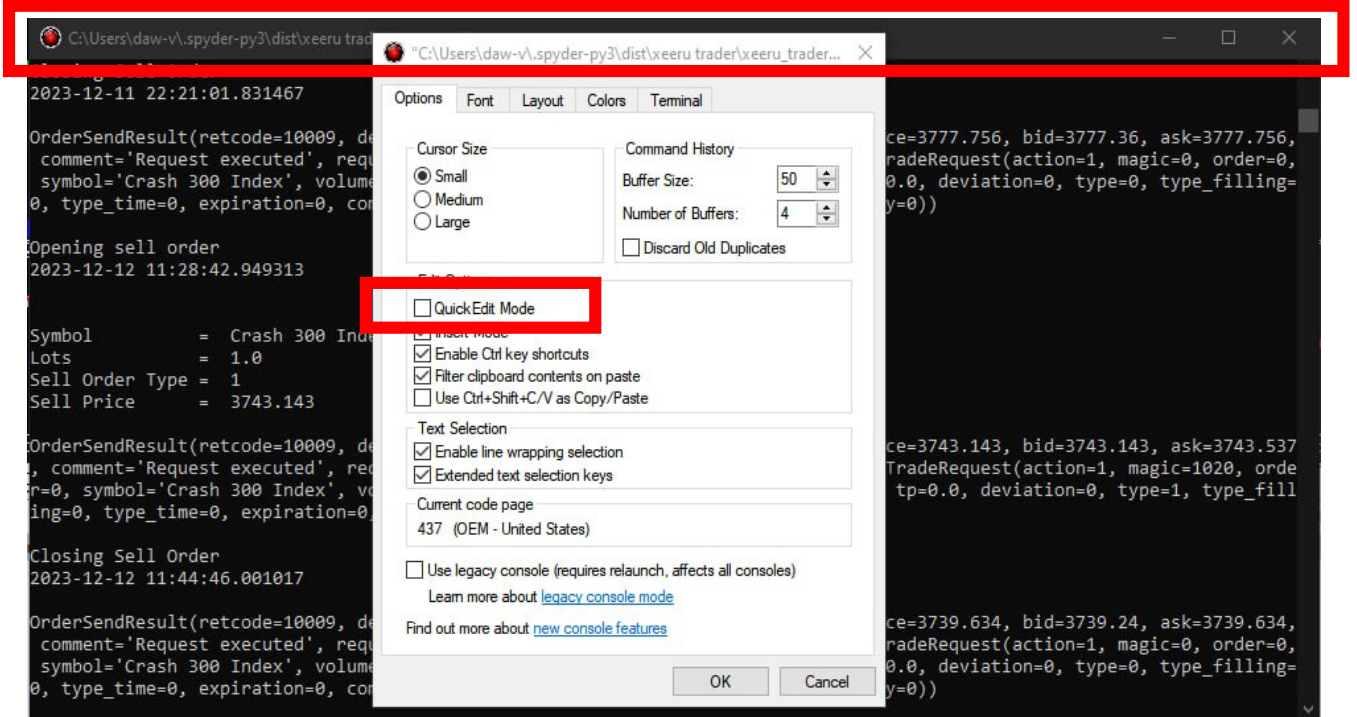

4. Open Xeeru Software

WARNING: Never close the Log Prompt window since it contains crucial data about how the software is performing. Never close the main program window or MetaTrader 5 either (it opens automatically when Xeeru is launched).

Setting up

5. Right-click on the top part of the Log Prompt window. Now, uncheck the "Quick Edit Mode" option. **Every time you open the software, you must perform this action.**

Setting up

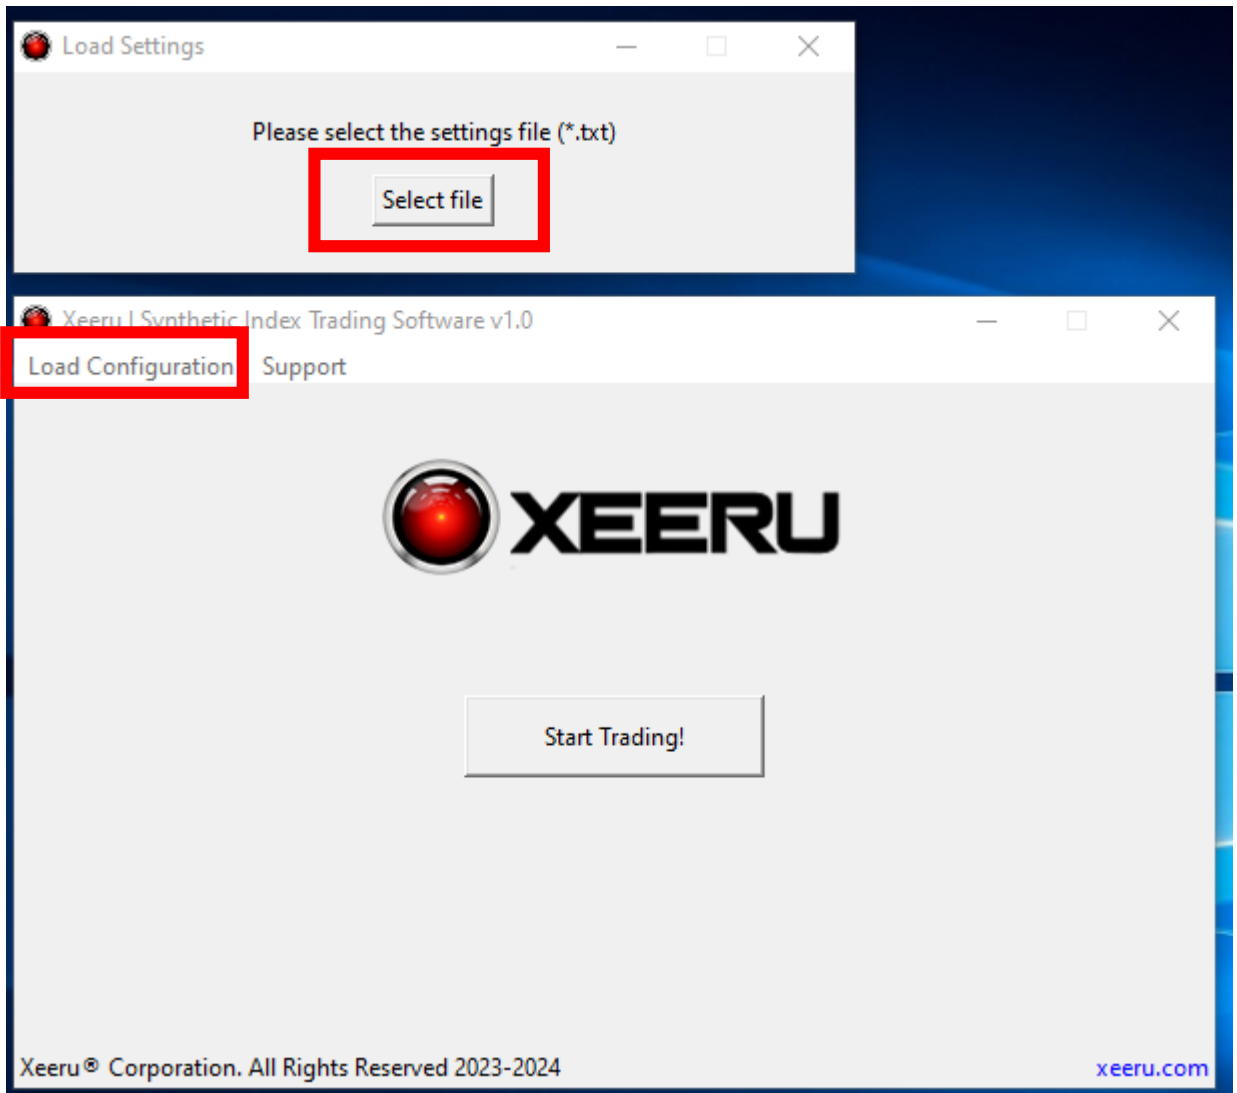

6. Insert the following 7 elements (in that sequence, line by line) in a text file called **config.txt** (you create it):

1. Xeeru single user license (obtained earlier).
2. The login ID for your MT5 trading account (obtained earlier).
3. The password for your MT5 trading account (obtained earlier).
4. The server for your MT5 trading account (obtained earlier).
5. Trading volume (always 1.0 lots).

Setting up

7. In the Load Configuration tab, load the config.txt file:

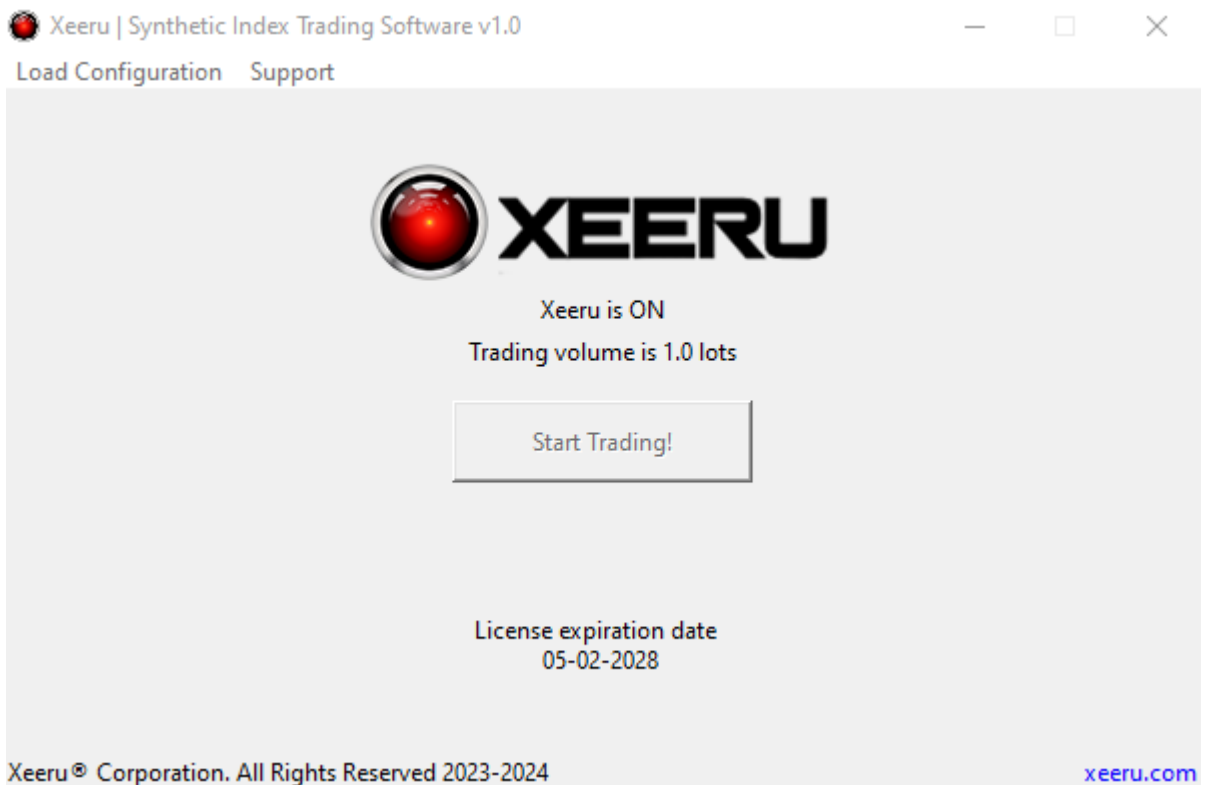

Important

Every single time the Xeeru software is opened, the config.txt file must be loaded.

Setting up

8. Click on **Start Trading!** Button. In the event that the data entered is correct, the program window and the Log prompt window should resemble the following:

Setting up

```
Initial Setup
30/11/2023 15:09:00

1.Serial Key      = 
2.MT5 Account Number = 
3.MT5 Account Password = 
4.MT5 Server      = Deriv-Demo
5.MT5 Lots        = 1.0

Metatrader 5 settings
Login = 
Balance = 10000.0
Equity = 10000.0

Please check carefully all the settings to ensure proper functioning of the Xeeru software
Now you can press the 'Start Trading!' button

License Key Success!
License Expiration date: 05-02-2028

Your IP address is 

Current version = 1.0
This is the latest Xeeru version

Analizing the market...
```

The software must be always open. If it is close, it will stop operating.

Remember: The Xeeru Software runs entirely on autopilot. It only has to be executed and kept running continually on a computer with a reliable internet connection, or you may utilize a VPS (Virtual Private Server)—both of which are advised.

Setting up

Xeeru software will automatically open only one trade at a time, which will be closed according to the embedded artificial intelligence algorithm. Once closed, if the algorithm conditions are met again, it will then open a new position. The opening and closing time of positions will depend on market conditions. this strategy will only take short positions.

```
Opening sell order
2023-12-01 14:33:00.676901

Symbol      = Crash 300 Index
Lots        = 1.0
Sell Order Type = 1
Sell Price   = 3411.272

OrderSendResult(retcode=10009, deal=3566183198, order=3625599088, volume=1.0, price=3411.272, bid=3411.272, ask=3411.65, comment='Request executed', request_id=127678786, retcode_external=0, request=TradeRequest(action=1, magic=1020, order=0, symbol='Crash 300 Index', volume=1.0, price=3411.272, stoplimit=0.0, sl=0.0, tp=0.0, deviation=0, type=1, type_filling=0, type_time=0, expiration=0, comment='Xeeru AI', position=0, position_by=0))

Closing Sell Order
